

Master in International Finance

Top Ranked Program

Madrid - Philadelphia - New York - London

+35 years of proven success

IEB is a center of higher learning studies, associated with La Universidad Complutense and founded in 1989, it was the driving force behind the launch of the first specialized master's in finance and financial markets in the Spanish-speaking world.

The globalization set in motion during the last century is consolidating in this 21st century. The world of finance is not exempt from what we are experiencing; indeed, financial markets are probably one of the catalysts of this movement and those who work in or with them can vouch for the international and global nature of their work environment. Any professional who looks for achievement and great success in the financial world should, therefore, not only have technical skills, but also a set of skills that can be applied internationally.

IEB, as leader in financial education in the Spanish-speaking world, offers this **Master in International Finance** to those individuals aiming to become international financial leaders in their respective fields.

The master's degree has been **accredited by the CNMV** to advise, as established in MiFID II.

Awards

The Programme has held the first position in El Mundo Annual Ranking the last six years.

Academic Stays

The program **starts in September and lasts one academic year** (during this time, in addition to the classes, students will prepare the dissertation, and the academic stays abroad) includes a total of **600 lecture hours**.

The majority of the program is taught at IEB's headquarters in **Madrid**, a city considered to be one of the key financial centers in Europe. The Spanish capital, as well as having its own enormous intrinsic strength and vitality, has the advantage of being **Europe's gateway to the Iber-American world**. Today, many of these emerging economies are playing a **key role** in the International Financial Markets.

In addition, Master in International Finance's students in the follow part of their study plan in two of the most prestigious business schools in the world of finance: Bayes Business School (**United Kingdom**) and the Wharton School (**USA**).

The Academic stays in these two **world references in financial education** and research not only provide the highest standard of teaching and content but also give an insight into key financial centers, such as London, New York and Philadelphia, worldwide references in international **financial leadership**.

The Master is **fully taught in English** and, as such, all lectures, class discussions, presentations, student-faculty communications, and documentation are in English. This is important as English the main language used in the financial world. The Master in International Finance is the best and most **complete Finance Program** in Spain.

The Program includes in **depth coverage** of all fields of finance relevant to today's financial world. The subjects range from corporate finance and treasury to all financial markets. It also includes important subjects today, such as risk management, regulation and ethics.

By covering all fields of finance, students are then able to choose their preferred area, in which they can then specialize and **develop a professional financial career**.

Calendar

Runs every year from September to October following year.

Schedule: Monday to Friday 9:00–14:00.

Duration: 600h

Admission

The Master is aimed at undergraduate students from all fields of study with a good level of English, as well as professionals with no more than four years working experience in finance or looking to change from their current field of work to the world of finance.

All candidates go through several interviews with the members of the Admissions Committee, as well as carrying out several online tests, before joining the programme. All candidates applying for the Master in International Finance should submit to the Admissions Department a duly filled in application form as well as provide a copy of their academic qualifications, their identity card or Passport, 4 passport size photos and a brief CV.

All candidates will have to take online tests to determine their level of English and other relevant knowledge as well as undertake personal interviews with members of the Admissions Committee.

Master in International Finance students come from all over the world and all types of academic background. They reflect the very international nature of the Programme.

Qualification

The qualification obtained at the end of the program is the Master in International Finance Degree. It is issued by the Academic Board of IEB. A diploma will also be issued by IEB's Partners for each academic stay.

Tuition Fees

Master's tuition fees are 25.800 €, including all necessary paper work, booklists, access to the IEB facilities, general expenses at all academic stays abroad including accommodation and some meals in USA, as specified in each one of the two different dossiers; not including: flight tickets and accommodation in London.

Master's tuition fee can be paid by single payment or in installments. All payments made by installment will need to follow a calendar that will be pre-agreed and specified on the Admission Certificate.

IEB maintains agreements with various financial entities, from which students can request special financing conditions.

IEB also has a program of scholarships and study grants.

IEB is member of:
